### Meet Chance

Everyone meet Chance! He is 5 years old and has a smile that can melt your heart. Chance has a pretty goofy sense of humor and his family loves to laugh with him. From playing X-Box to bike rides with his best friend, this kiddo knows how to live, and fully embarrasses every bit of fun that life has to offer.

Chance was diagnosed with Leukemia (ALL) in 2017, he had underwent chemotherapy treatment at the Alberta Children's Hospital where they took exceptional care of him. He was 2 and a half when treatments started, just a baby still in diapers. Today he is medically stable but still on treatment, the treatment protocol for ALL typically lasts for 2 years.

Mom- Christina says, "he is our super hero. He's one of the strongest and bravest kid's I know. He's even taught his sister how to take a needle. He is super resilient and taught himself to walk all over again at the beginning. He's come such a long way! "

He loves to entertain people, especially his grandparents who live with him.

He eats like a horse most days and the doctor's and nurse's can't believe how big he is now.

The family will be island bound, to Victoria, BC, in July, where Chance will get to meet extended family and make memories of where his Mom grew up.

Here in Alberta and the NWT, Children's Wish now unified with Make-A-Wish we know we can grant over 130 wishes per year to children just like Chance. Your donation allows us to continue bringing joy to children battling life-threatening illness.
